
BTSE

(Sr.) Frontend Developer

CANDIDATE PARTICULARS

NAME : Mandy Lan (藍曼婷)

YEAR OF BIRTH : 1992 (33 years old)

NATIONALITY : Taiwan

LANGUAGES : Written - Mandarin (Native), English (Working Level)

Spoken - Mandarin (Native), English (Working Level)

EDUCATION

2015/09 – 2017/06	National Central University Master's Degree, Communication
2011/09 – 2015/06	National Central University Bachelor's Degree, Communication

PROFESSIONAL SUMMARY

- Possesses 3+ years of frontend development experience, specializing in Vue.js with expertise in Vue Router, Vuex, Vue I18n, and Element UI.
- Experienced in frontend performance optimization, reducing package size by 77% and response time by 90% using gZip, CDN, and image compression.
- Independent development and project experience, leading the frontend development of KKBot, integrating WebSocket and ChatGPT, and successfully launching it on the App Store.
- Cross-device compatibility and UI development, implementing Responsive Web Design (RWD) to ensure optimal user experience across desktops, tablets, and mobile devices.
- Strong collaboration and project management skills, working closely with PMs and UI designers using JIRA to ensure project timelines and accurate UI implementation.
- Proficient in implementing frontend infrastructure to optimize performance and development experience.
- Tech Stacks: Vue.js, HTML, CSS, Webpack, Git, eCharts, Vuex

PROFESSIONAL EXPERIENCE

Emotibot

2022/02 – 2024/04

Frontend Engineer

- Fluency in Vue.js related frameworks, such as Vue Router, Vuex, Vue I18n, Vue CLI, and Element UI.
- Improved server performance by reducing package size by 77% and response time by 90% through the implementation of gZip, CDN, and image compression techniques.
- Independently developed the frontend of KKbot, utilizing WebSocket technology and integrating seamlessly with ChatGPT. Successfully deployed the application to the App store.
- Implemented Responsive Web Design (RWD) for various chat bot webpages, providing optimal viewing and user experience across personal computers, tablets, and mobile devices.
- Collaborated with UI designers and utilizing JIRA with PM to ensure project timelines and accurate UI design requirements.
- Developed a transcript web page that provides real-time and online speech recognition functions.
- Experienced in using related technologies such as Webpack, Git, ECharts, NGINX, and Docker.
- Project: <https://apps.apple.com/gb/app/chatbot-voice-kkbot/id6446677103>

Reason for Leaving:

Company downsizing.

Delta Electronics Inc.

2017/11 – 2022/01

Software Engineer

- Develop and maintain frontend of switch websites using Vue.js and Restful API, and backend with Node.js and Express.js.
- Technical debt reduced by 15% when responsible for bug fixes and code reviews.
- Optimize server response time from 30 seconds to 1 second by modifying the backend algorithm.
- Build test cases for automation testing and debugging (Python + Robot Framework).
- Design and implement Zero Touch Provisioning (ZTP) protocol on Linux platform.

Reason for Leaving:

Looked for a pure web frontend developer position.
