Skills

- **Frontend Development:** React, MUI, React Query, React Hook Form, Vue, Vuex, JavaScript (ES6+), TypeScript, Vite, Webpack
- **Efficiency & Innovation:** Performance optimization, build acceleration, automated testing (Cypress, Vitest)
- **Development Processes:** Establishing development standards, workflows, promoting Agile/Scrum, proficient in Git

Experience

Senior Software Engineer - PChome Online

March 2023 - Present

- Built a new e-commerce admin frontend with React and MUI from scratch.
- Led the frontend team to launch the system, receiving positive vendor feedback and improving operations.
- Designed and implemented CI/CD strategies and monorepo architecture, boosting development speed and deployment efficiency.
- Optimized the build process, cutting CI/CD execution time by 61% (4m20s → 1m40s).
- Introduced automated testing (Cypress, Vitest), ensuring system stability and reducing regression issues.
- Established development guidelines, workflows, and a code review process, enhancing team collaboration and delivery speed.

Front End Engineer - PChome eBay

Sep 2020 - Feb 2023

- Developed and maintained e-commerce platform features using Vue, Vuex, and Less.
- Upgraded Vue & Vuex to refactor the shopping cart, improving page load speed.
- Implemented Cypress automated testing, ensuring shopping cart stability and reducing regression issues and manual testing workload.
- Optimized Webpack configuration, reducing build time by 60% and JS bundle size by 30%, accelerating page load speed.
- Contributed to the Scrum team, successfully delivering projects that enhanced buyer experience, increased PV and order volume, and reduced customer complaints.
- Led the migration from SVN to Git, improving team collaboration and reducing development environment storage usage by 10x.
- Mentored two junior frontend engineers, providing technical documentation and code reviews to help them onboard and develop independently.

Senior Product Manager - VAR LIVE

May 2017 - Jun 2019

- Led a cross-functional team of 15+ members, collaborating closely with 3D artists, VFX designers, software and hardware engineers, and sound engineers to conceptualize, design, and develop 6 immersive VR games for use in amusement parks, VR experience centers, and arcades.

Project Manager, Game Programmer - OXON Game Studio

Oct 2015 - Apr 2017

- Collaborated with cross-functional teams to develop the mobile game "Galaxy Reavers," contributing to product requirements, project timelines, and game art outsourcing.
- Optimized game performance by implementing Unity3D optimization techniques, reducing draw calls for special effects and achieving smooth gameplay on mobile devices.

Game Programmer - CuCu Ltd.

Feb 2015 - Sep 2015

- Led game development projects, managing timelines, requirements, and developing mobile games using Unity3D and C#.

Game Programmer - Fun Yours Technology

Sep 2013 - Jan 2015

- Developed web and mobile games, contributing to software development and game content design.

Education

National Yunlin University of Science and Technology

Yunlin, Taiwan

Bachelor's Degree in Information Management

June 2009 - June 2013

Certifications

Team Kanban Practitioner – Kanban University

May 2022
