

SUMMARY

I'm a Frontend Engineer with 5 years of experience in Web2 and Web3 development. I've built DCA, staking pools, swap/bridge features, and wallet functions for web and mobile using React and React Native. Also skilled in smart contract development through the AppWorks Blockchain Program & SheFi community.

I'm a fast learner, eager to ask questions and share insights. I love building reusable code and sensitive to UX. Additionally, I am open-minded, passionate, and an organized team player.

WEB3 FRONTEND ENGINEER 07/2024 - 06/2025 EWE Technology - Taipei - Hybrid

- Implement Swap & Bridge with Li-Fi SDK.
- Implemented features including Staking Pool, DCA with contracts on Arbitrum.
- Integrated transactions history from Arbiscan API.
- Implemented Web3 Synpress E2E testing.
- Implemented App E2E testing using Maestro, Detox.
- Develop Wallet App using React Native, Expo, Viem, Tanderly, Wagmi, Zustand, Monorepo using Nx, GA tracking events, Anvil testing scripts.

FRONTEND ENGINEER 06/2022 - 10/2023 NOODOE Inc. - Taipei - Hybrid

- Manage 8 projects, developing by React, Typescript, MUI, react-query, react-hook-form, Jotai, i18n, including internal system, dashboard, and end user interfaces.
- Integrate multiple payment gateways, ex: Stripe, Tappay.
- Integrate various third-party libraries.
- Integrate RESTful and GraphQL APIs.
- Deploy projects on AWS S3 using Jenkins.
- Implement E2E test with Playwright, Cucumber.
- Run SCRUM, manage tasks on JIRA, release every 2 weeks.

FRONTEND ENGINEER 12/2020 - 05/2022 Arista Corporation - New Taipei - On-Site

- Build a project from scratch using React, JavaScript, Redux, Webpack, and Web Socket to manage the dashboard and single system.
- Create reusable UI components with design tokens.

WORKING HOLIDAY 08/2019 - 05/2020 Berlin, Germany

PRODUCT MANAGER 08/2017 - 05/2019 Wang Ping Pet - New Taipei - On-Site

React | Typescript | Next.js | Git

React Native | Expo | Node.js

Web3 | Solidity | Foundry

EDUCATION

SheFi Scholar Session #14

SheFi - Online

July 2025 - Sep 2025

Blockchain Program Batch #3

AppWorks School - Taipei

Sep 2023 - Jan 2024

Frontend Program #MFEE09

Institute for Information Industry - Taipei

July 2020 - Nov 2020

Exchange Program of Tourism Marketing

Universitat de Girona - Barcelona, Spain

Sep 2016 - Jul 2017

Bachelor Degree, International Business

National Dong Hwa University - Hualien

Sep 2012 - Jun 2017

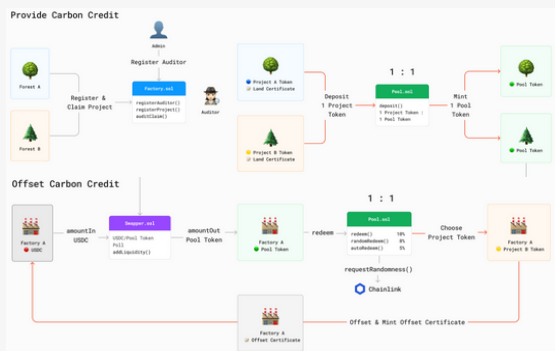

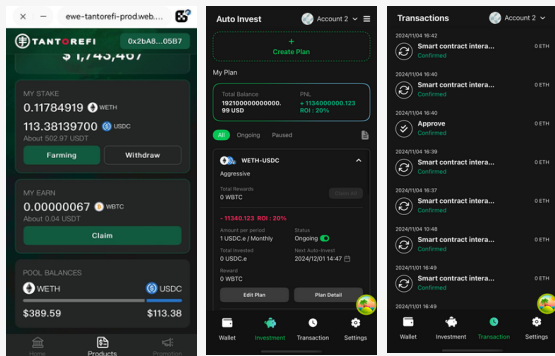

ACTIVITY

- 2023 Audi Innovation Award Women Hackathon (First Place)
- 2023 Taipei Codefest Hackathon

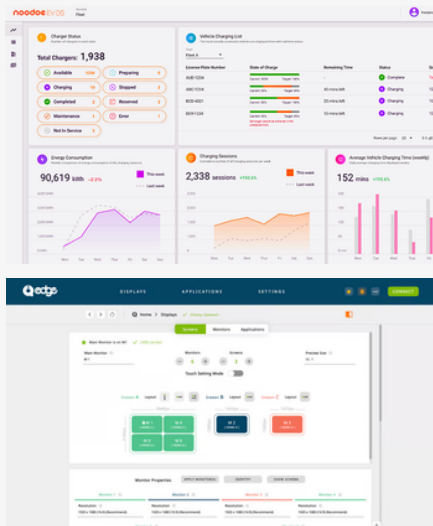

LANGUAGE

Mandarin (Native), English (TOEIC 915)

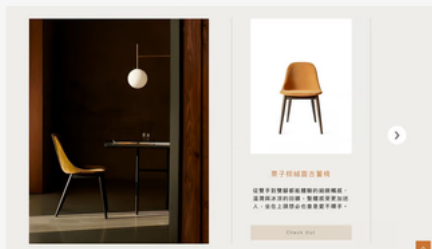

BLOCKCHAIN PROJECT

FRONTEND PROJECT

FULLSTACK PROJECT

BENTY WALLET APP

- Implement Swap & Bridge with Li-Fi SDK.
- Integrate Arbiscan API with Account History Transaction.
- Integrate contract with staking/withdraw/claim pool.
- Integrate contract with DCA investment.
- Integrate E2E testing by Maestro, with anvil scripts.
- Integrate subgraph API with strategy events.

TANTO WEB STAKING DEFI

- Implement Synpress Web3 E2E Testing, create a Metamask wallet before login to web3 Defi, and perform staking/withdraw actions.
- Implement contract with staking, withdraw functions.

CARBON CREDIT TRADING CONTRACT

- Pool : Deposit project token 1:1 mint pool token to convert ERC721 fragment ERC20 token into Pool. 2 ways to redeem project token, random by Chainlink, specific with higher fee.
- Swapper : Build AMM on Uniswap V2, USDC/Pool Token Pool.
- Certificate : Offset to generate a ERC721 certificate.

BOOK WORM LAND DAPP

- Developed contracts and test by Solidity and Foundry, deploy contracts on Sepolia Testnet by Thirdweb.
- Developed frontend Dapp by Nextjs, Thirdweb, component by Shadcn, styles by Tailwind, deployment by Vercel.
- Implement book search and create reviews Dapp on Blockchain.

EVOS (CHARGER MANAGEMENT)

- Charger Management : Data Dashboard, Charger Settings, Parking Lot Kiosk, RFID, Community, Fleet.
- End user "Scan, Pay, Charge" : White Label, Demo Site, Subscription Plan.
- Installer to activate : Activate chargers, Credit Card Reader, Kiosk, Photo Uploader.

THIN MANAGEMENT

- Thin Client Management : Remote control and manage all controlled screens.
- Single System Thin Client : Run on single thin client, set up thin clients.

PERSONAL NOTES

- Note site to share my markdown notes : Frontend use Docusaurus, deploy use Vercel, integrate algolia for search and giscus for comment.

E-COMMERCE WEBSITE

- E-commerce website : member, cart, payment systems.
- Admin Dashboard : product setting, review function.

LINEBOT

- Search product price, order status on linebot.
