ABOUT ME

With over 5 years of front-end experience, primarily using React and Vue with TypeScript, I specialize in delivering high-quality, maintainable, and scalable web applications. My approach emphasizes code quality, readability, and modularization, complemented by automation to streamline development processes.

I leverage AI technologies to enhance development efficiency, reduce repetitive tasks, and optimize workflows. Passionate about exploring new technologies, I continuously self-study to refine my skills and integrate innovative solutions into my development process. I also enjoy sharing knowledge through team sessions and working on side projects to experiment with technologies beyond my daily responsibilities. My diverse project experience, ranging from back-end accounting systems to AI-powered Healthcare Platform, has equipped me with a solid foundation in front-end development and the ability to adapt to different domains.

SKILLS

Front-end

HTML, CSS, SCSS, styled-components, JavaScript, ReactJS, Next.js, Vue3, Angular, JSP, PWA, GraphQL, TypeScript, XState, Web LLM, SWR, Three.js, Bootstrap, MaterialUI

Back-end

Node.js

Database

SQL, FireStore

Tools

Azure, AWS, GCP, Heroku, Vercel, Jest, Selenium, Vite, Webpack, Storybook, Docker

Others

Git, Figma, Zeplin, WordPress, QGIS, Photoshop

WORK EXPERIENCE

Aha AI

Senior Front-end Engineer | 2024.06 - 2024.11

- Optimized system performance to enhance user experience and platform efficiency.
- Integrated [Stream](#) WebRTC technology to manage tens of thousands of real-time messages daily.
- Integrated real-time chat functionality and ChatGPT services, enhancing communication capabilities and AI-driven user interactions.
- Utilized SWR to optimize data fetching and caching, significantly improving data loading times and reducing server requests.
- Implemented Redux for effective state management, ensuring smooth application flow.

Aha (Next.js & TypeScript) : Aha is an AI-driven exam prep and analytics platform designed to help students improve and achieve their dream scores. ([link](#))

AICS (ASUS Intelligent Cloud Services)

Software Engineer | 2022.07 - 2024.05

- Improved medical system performance issues.
- Introduced OpenReplay technology to collect user action and integrate Jira for product issues.
- Used VitePress to auto-generate UI component page by codebase.
- Used Jest for unit test and Selenium for E2E test to ensure code quality.
- Used XState and Pinia to control data management.
- Used GraphQL to fetch data dynamically in multiple scenarios to improve performance.

xHIS (Vue3 & TypeScript) : An internal medical system that provides medical services and AI recommendations for hospitals. ([Introduction link](#))

xHIS Lite (Vue3 & TypeScript) : An internal medical system that provides medical services and AI recommendations for clinics.

Rule Editor (Vue3 & TypeScript) : An internal medical support system that provides hospital IT to visually establish NHI rules.

Playsee

Senior Front-end Engineer | 2021.06 - 2022.06

- Led the architecture design of multiple projects.
- Mentored the junior engineer, and also attended the talent acquisition interviews.
- Worked on performance issues for Core Web Vitals for SEO.
- Introduced Sentry service to collect system error logs.
- Used XState optimizes state management to reduce bugs caused by mixed state data.
- Used styled-components, SCSS, and Material-UI to handle layout.
- Used Storybook to optimize the development experience and reduce communication costs with UI Designer.
- Used react-spring to produce physical motion animations and improve CSS Animation lag on some devices.

Playsee AskNearby (Next.js & TypeScript) : A platform for users to ask any question on the world map. ([link](#))

Playsee Ads (React) : A system for users to place advertisements into the app, and provide advertisement performance analysis and management. ([link](#))

Playsee Share (Next.js) : A platform for users to share app content to the web to expand product usage. ([link](#))

Playsee Email System (Next.js) : An internal system that provides email templates to the back-end for sending emails.

Acer

Project Engineer | 2019.04 - 2021.04

- As the vice leader, responsible for leading the front-end architecture and leading junior engineers.
- Used TypeScript to optimize code and use Karma for e2e testing to reduce bugs.
- Used REST and GraphQL to handle API data depending on the situation.

Planet9 (React & GraphQL) : A worldwide e-sports social platform dedicated to matching coaches and e-sports players. ([link](#))

NTNU Office of International Affairs System (Next.js & TypeScript) : A school system for teachers and students to operate and comply with accessibility guidelines. ([link](#))

International Microsurgery Website (Angular & React & TypeScript) : A social platform for doctors, with forums, chat rooms, friends, videos and cash flow, etc. ([link](#))

iWant (Angular & TypeScript) : A platform for recruiting campus lectures and keynote speakers.

Acer ITS accounting system (Angular & TypeScript) : An accounting system within Acer ITS.

There are various identity permission controls for users.

Public Functionary Disciplinary Sanction Commission system (JSP & WordPress) : An internal system in the Court of Justice.

SIDE PORJECT

Boba-maps (2019)

Frontend: ([link](#)) Backend: ([link](#))

An interactive platform that recommends beverages based on user preferences.

Front-end

- Angular, RxJS, Firebase SDK, Google Maps API, Push notification, PWA, Service Worker, GA, Canvas

Back-end

- Golang, Google Maps API, AWS RDS

Infra

- Heroku (front-end), AWS Elastic Beanstalk (back-end), Simple Storage Service, Route 53, Certificate Manager

MRT-foods (2021)

source: ([link](#)) demo: ([link](#))

A food recommendation platform designed for group dining near Taipei MRT stations.

Front-end

- Next.js, Google Maps API, XState

Back-end

- Node.js (Next.js), Google Maps API

Pronection (2022)

source: ([link](#)) demo: ([link](#))

A location-based real-time chat platform for regional social interactions.

Front-end

- Next.js, Google Maps API, Firebase Auth, Firebase Cloud Messaging, Push notification, PWA, Redux

Back-end

- Node.js (Next.js), FireStore

Review Radar (2025)

source: ([link](#)) demo: ([link](#))

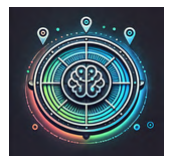

An AI-powered review management tool that analyzes the authenticity of Google Maps reviews and generates personalized responses based on historical data.

Front-end

- Next.js, OpenAI, Gemini, PWA

Back-end

- Node.js (Next.js)

Street Chat (2025)

source: ([link](#)) demo: ([link](#))

A real-time 3D street communication platform where users can chat and interact in a virtual street environment, featuring WebGPU-accelerated on-device AI chat.

Front-end

- Next.js, Three.js, WebGL, LLM, WebAssembly, WebGPU, IndexedDB, Service Worker, PWA, Firebase

EDUCATION

Chung Shan Medical University

Medical informatics | 2014.09 - 2018.06

陳盈凱

Senior Front-end Engineer

ABOUT ME

我擁有超過五年的前端開發經驗，主要使用 React 和 Vue 搭配 TypeScript，專注於打造高品質、可維護且具擴展性的網頁應用程式。我特別重視程式碼品質、可讀性與模組化，並利用自動化工具來優化開發流程。

我善於運用 AI 技術來提升開發效率、減少重複性工作，並優化工作流程。我熱衷於探索新技術，持續自學以精進技能，並將創新解決方案融入開發過程。此外，我也樂於透過團隊分享會交流知識，並透過 side project 嘗試日常工作以外的技術。過去參與的專案涵蓋從後端會計系統到 AI 醫療平台，讓我在前端開發方面建立了扎實的基礎，也具備適應不同領域需求的能力。

SKILLS

Front-end

HTML, CSS, SCSS, styled-components, JavaScript, ReactJS, Next.js, Vue3, Angular, JSP, PWA, GraphQL, TypeScript, XState, Web LLM, SWR, Three.js, Bootstrap, MaterialUI

Back-end

Node.js

Database

SQL, FireStore

Tools

Azure, AWS, GCP, Heroku, Vercel, Jest, Selenium, Vite, Webpack, Storybook, Docker

Others

Git, Figma, Zeplin, WordPress, QGIS, Photoshop

WORK EXPERIENCE

Aha AI

Senior Front-end Engineer | 2024.06 - 2024.11

- 優化系統效能，提升使用者體驗及平台效能。
- 整合 [Stream](#) WebRTC 技術來處理每天數以萬則的即時訊息。
- 整合即時聊天功能和 ChatGPT 服務，增強溝通能力及 AI 驅動的使用者互動。
- 使用 SWR 優化資料獲取和快取，大幅改善資料加載時間並減少伺服器請求。
- 使用 Redux 進行狀態管理，確保應用程式流程順暢。

Aha (Next.js & TypeScript)： Aha 是一個由 AI 驅動的考試準備分析平台，幫助學生提升並實現理想成績。 ([link](#))

AICS (ASUS Intelligent Cloud Services)

Software Engineer | 2022.07 - 2024.05

- 改善醫療系統效能的問題。
- 導入 OpenReplay 技術來收集使用者的行為以及整合 Jira 來處理線上系統問題。
- 使用 VitePress 來由程式碼自動生成 UI 元件網頁，以改善開發體驗。
- 使用 Jest 進行 unit test 以及 Selenium 進行 E2E test 來確保程式碼的品質。
- 使用 XState 以及 Pinia 來控制資料流。
- 使用 GraphQL 在某些場景動態的讀取資料以提升效能。

xHIS (Vue3 & TypeScript)：內部的醫院醫療系統，提供醫療服務以及 AI 建議。 ([Introduction link](#))

xHIS Lite (Vue3 & TypeScript)：內部的診所醫療系統，提供醫療服務以及 AI 建議。

Rule Editor (Vue3 & TypeScript)：內部的醫療輔助系統，提供醫院 IT 視覺化的建立健保稽核。

Playsee

Senior Front-end Engineer | 2021.06 - 2022.06

- 主導多個專案的架構設計。
- 帶領 junior engineer 以及擔任技術面試官。
- 為了 SEO 針對 Core Web Vitals 處理過效能的問題。
- 導入 Sentry 來收集系統的錯誤資訊。
- 使用 TypeScript 優化程式碼以及使用 Jest 進行 unit test 自動化測試以減少 bug 產生。
- 使用 XState 優化狀態管理，減少因狀態資料混雜而產生 bug 的問題。
- 使用 styled-components、SCSS、Material-UI 處理 layout 的部分。
- 使用 Storybook 優化開發體驗，減少與 UI Designer 的溝通成本。
- 使用 react-spring 以產出符合物理運動的動畫效果並改善 CSS Animation 在某些裝置延遲的狀況。

Playsee AskNearby (Next.js & TypeScript)：供使用者在全世界的地圖上發問任何問題。 ([link](#))

Playsee Ads (React)：供使用者投放廣告至 app，並提供廣告成效分析、管理。 ([link](#))

Playsee Share (Next.js)：提供使用者分享 app 內容至 web，以擴展產品使用率的一個平台。 ([link](#))

Playsee Email System (Next.js)：提供 email template 給 back-end 發送 email 的一個內部系統。

Acer

Project Engineer | 2019.04 - 2021.04

- 擔任副組長一職，負責主導前端的架構以及教導 junior engineer
- 使用 TypeScript 優化程式碼以及使用 Karma 進行 e2e test 以減少 bug 產生。
- 使用 REST 以及 GraphQL 依情境不同來處理 API 資料。

Planet9 (React & GraphQL)：專門媒合教練與電競玩家的一個大型電競社交平台。 ([link](#))

師範大學國際事務處系統 (Next.js & TypeScript)：供教職員和學生操作的一個校務系統，並遵守無障礙設計規範。 ([link](#))

IMW 國際醫療交流平台 (Angular & React & TypeScript)：專屬於醫生的小型社交平台，有論壇、聊天室、好友、影片和金流的功能等等。 ([link](#))

iWant (Angular & TypeScript)：募集校園講座和主講者的一個平台。

Acer ITS 帳務系統 (Angular & TypeScript)：Acer ITS 內部的帳務系統，有多種身分權限控管供使用者操作。

公務人員懲戒委員會系統 (JSP & Wordpress)：司法院內部的管理系統。

SIDE PORJECT

Boba-maps (2019)

Frontend: ([link](#)) Backend: ([link](#))

一個根據使用者口味偏好，推薦飲料的互動式平台。

Front-end

- Angular, RxJS, Firebase SDK, Google Maps API, Push notification, PWA, Service Worker, GA, Canvas

Back-end

- Golang, Google Maps API, AWS RDS

Infra

- Heroku (front-end), AWS Elastic Beanstalk (back-end), Simple Storage Service, Route 53, Certificate Manager

MRT-foods (2021)

source: ([link](#)) demo: ([link](#))

一個專為台北捷運站附近聚餐設計的美食推薦平台。

Front-end

- Next.js, Google Maps API, XState

Back-end

- Node.js (Next.js), Google Maps API

Pronection (2022)

source: ([link](#)) demo: ([link](#))

一個基於位置的即時聊天室，提供區域性社交互動。

Front-end

- Next.js, Google Maps API, Firebase Auth, Firebase Cloud Messaging, Push notification, PWA, Redux

Back-end

- Node.js (Next.js), Firestore

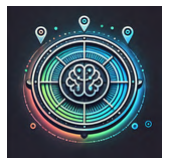

Review Radar (2025)

source: ([link](#)) demo: ([link](#))

一個結合 AI 的評論管理工具，可分析 Google Maps 評論的真偽，並根據歷史數據自動生成個性化回覆。

Front-end

- Next.js, OpenAI, Gemini, PWA

Street Chat (2025)

source: ([link](#)) demo: ([link](#))

一個基於 3D 街景的即時通訊平台，讓使用者在虛擬街道中聊天與互動，並支援 WebGPU 加速的本地 AI 聊天。

Front-end

- Next.js, Three.js, WebGL, LLM, WebAssembly, WebGPU, IndexedDB, Service Worker, PWA, Firebase

EDUCATION

Chung Shan Medical University

Medical informatics | 2014.09 - 2018.06
